

Quality in-home  
**ABA therapy** to  
help your child  
with autism **thrive.**

# Experienced, skilled and caring in-home ABA therapy

We provide top-quality, individualized in-home ABA therapy for children with autism.

As passionate professionals with 30+ years' experience, we'll help your child progress beyond your expectations.

With our vast knowledge, sharp insights & unconditional devotion to your child's growth, your child will develop the communication, social and daily living skills they need to thrive.

\* Most insurances accepted

## What we do

We provide 1:1 in-home ABA therapy to help your child with autism develop skills, meet milestones and gain independence.

Our individualized treatment plans, trained therapists and hands-on approach ensures you'll celebrate measurable, visible progress as your child:

- ✔ Develops **language and communication skills** like making requests, following instructions, interpreting non-verbal cues
- ✔ Decreases **problem behaviors** like self-harm and tantrums
- ✔ Gains **daily living skills** like personal hygiene and dressing oneself
- ✔ Builds **social skills** like managing group interactions, forming relationships

## Measurable, meaningful progress is the result of:

### **Hand-picked, skilled therapists**

Enables your therapist to connect meaningfully with your child and slot comfortably into your home environment.

### **Individual therapy plan**

Caters to child's unique needs and parents' chosen goals.

### **Meticulous monitoring**

Ensures your child is progressing adequately and meeting goals at the ideal rate.

### **Parent collaboration**

Empowers parents to cope better at home by using the ABA method in their daily life.

# Your child **can** have a bright future

Before we started, he couldn't communicate – he only could point. **Now Daniel tells me in one or two words what he wants**, so I don't need to guess."

– Stacy G.

**Their caring and devotion together with the level of expertise is exceptional.** They are extremely hands-on. There's constant supervision of the technicians, tweaking the programs, and working on new initiatives. They provide very individualized attention."

– Meghan S.

Sam was frustrated, disconnected, and I was overwhelmed and helpless. Slowly, he is coming out of his shell. **There are huge improvements.** He can follow instructions. He's sitting at the table, he is joining the family, is more involved. **I'm so optimistic now. There is light at the end of the tunnel.**"

– Hope N.

The progress you need.

The support you crave.

The future you dream of.
